EXCELLENCE IN DESIGN

AMERICAN BUILDING'S EXCELLENCE IN DESIGN BUILDING OF THE YEAR: Pitt-Ohio

2022

2022 EXCELLENCE IN DESIGN

EACH **AWARD-WINNING PROJECT** HIGHLIGHTS THE **DIVERSE** APPLICATION AND **EXPANDING BOUNDARIES** OF METAL SYSTEMS CONSTRUCTION.

American Buildings would like to congratulate the winning entries in the 2022 Excellence in Design competition. We're proud of our Builders and the powerful partnerships we've built, which helped bring these award-winning projects to life in categories ranging from recreation to retail, and office to manufacturing.

The Excellence in Design competition offers a compelling outlet for inspiring new designs that illustrate the many ways metal building systems can meet varying construction needs, regardless of size or complexity. American Buildings works with Authorized Builders to transform ideas into reality and expand metal building systems construction.

GOLD

Staying true to their commitment as a responsible partner in future sustainability, Pitt-Ohio, a leader in the trucking industry, significantly invested in a new 95,765 sf facility that received Gold LEED status. The pre-engineered metal building, provided by Authorized Builder C. Tucker Cope and Associates, Inc., features a terminal, mechanic shop, office, and warehouse. Dedication to environmental and social responsibility is evident in numerous design decisions, such as choosing metal construction due to its sizable percentage of recycled content, a metal roof system utilizing cool coatings and the addition of solar panels to support an overall microgrid effort for the facility, energy efficient light wall panels allowing natural light. The installation of eight wind turbines onsite capture and store additional natural energy for the facility's use.

SILVER

With the goal of creating a modern office that would be easy to maintain in the future, as well as to highlight the growth of the company, Authorized Builder Goodgame Company, Inc. built a pre-engineered metal building for Southern Food Brokers, a retail food broker of perishable foods in the Southeast. The 9,208 sf building displays a juxtaposition of contemporary lines with a single slope roof with eave high overhangs and 1:12 roof pitch, against the combination of added rock and brick on the exterior delivering a rustic feel, a style fitting to the views of the countryside. The structure utilizes American Buildings' Standing Seam II roof system.

BRONZE

The 15,000 sf flagship building for Rugged Radios, built by Authorized Builder D.A. Craghead Construction, Inc. features accent columns and trim, a structural steel tower, and varying wall panel and trim colors to enhance the architectural design elements. Two 5,000 sf ancillary metal buildings showcase a traditional style with parapets, special accent trims and glass sectional doors. A small metal building anchors the corner of the development and was designed to emulate an old gas station. Small, yet complex, this building has a level canopy and utilizes insulated metal panels, soffits, and special trims. The vintage radio tower and gas station theme made the project a shoo-in to be constructed of metal building products, providing the campus with a feeling of an era gone-by with the modern efficiencies of a wide-open structure.
